NCR VOYIX

Voyix Self-Checkout
Card and Cash

Voyix Self-Checkout (SCO) Card and Cash

The next generation of self-checkout hardware provides retailers with the most innovative and personalized experiences. This extensible and configurable piece of hardware will compliment each individual retailer's storefront while increasing shopper throughput and shopper satisfaction.

Compliment your brand's image

The contemporary personalization of the NCR Voyix Next Generation Self-Checkout will compliment virtually any retail environment and branding. With its sleek, compact design, the NCR Voyix SCO HW Model expands the visibility between your attendants and shoppers, giving attendants a clear line of sight to monitory all self-checkout lanes. It also provides extra branding opportunities with accent lighting, animated displays and swappable panels.

Configure your entire storefront

Quickly convert your self-checkout lanes from card to cash. With the next generation of self-checkout, retailers can configure their hardware model to their stores in a unique way to provide them with the best experience. Retailers no longer have to take up valuable time configuring/changing out different hardware. They can now swap out different pieces of the model on their own time, in an easy and scalable way.

Enhanced self-checkout capabilities

Extend the capabilities at your self-checkout with dynamic lane sizing, display upgrades, RFID and vision. The new hardware model is compatible with multi-sensor checkout such as RFID, palm payments and computer vision. Your employees can implement these opportunities on the self-checkout, all while not disrupting the store experience.
